

ALPECCA - Claude Image Naming Guide

Generated: 2026-06-14 | Image files indexed: 261

Purpose: this PDF is a Claude-ready handoff document for organizing, renaming, and quality-checking the Alpecca images and Live2D production assets generated in this chat.

1. Non-negotiable Alpecca canon checks

Rule	Guidance
White inner shirt only	Alpecca must not have a black shirt or dark undershirt. Black is limited to high-waisted shorts and thigh strap unless intentionally changed for a specific wardrobe mode.
Connected ears	Both ears must be anatomically connected to the head and partially tucked under/behind the side hair. Reject floating or disconnected ears.
Consistent lanyard	Use the same blue neck strap, centered chest placement, rectangular clear ID badge, readable ALPECCA branding, power icon, and simple assistant ID layout.
Style lock	Clean modern anime style, crisp lineart, soft cell shading, warm assistant feeling, no fantasy armor, no cyberpunk darkness, no photorealism.
Layer assets	For Live2D production layers, use isolated single assets on transparent PNG or plain white background. No grids, labels, bust portraits, or repeated panels.

2. Recommended folder system

- 00_raw_originals/ - untouched exports from ChatGPT or user uploads.
- 01_reference_sheets/ - design sheets, wardrobe sheets, rigging guides, and composite sheets used only for reference.
- 02_approved_character_busts/ - approved expression and mouth/eye reference portraits.
- 03_wardrobe_modes/ - mode sheets and 4-view turnarounds.
- 04_motion_desktop_chibi/ - poses, movement cycles, desktop companion, and chibi/notification art.
- 05_live2d_layers/ - isolated transparent PNG layer assets only.
- 99_rejects_redo/ - failed grids, detached-ear outputs, black-shirt mistakes, and inconsistent badge/lanyard versions.

3. Canonical filename grammar

Use lowercase snake_case with zero-padded numbering:

alpecca_[category]_[###]_[short_descriptor]_v[##].png

Category	Example filename
Expression bust	alpecca_expr_001_default_open_corrected_ears_lanyard_v01.png
Mouth layer	alpecca_l2d_mouth_001_a_ah_open_vowel_v01.png
Eye layer	alpecca_l2d_eye_001_eye_white_pair_v01.png
Wardrobe sheet	alpecca_wardrobe_001_companion_mode_turnaround_v01.png
Reference only composite	alpecca_reject_composite_001_failed_grid_eye_expressions_v01.png

4. Category code guide for Claude

Code	Use for	Claude action
source_ref	User-uploaded or source reference image	Keep raw; do not overwrite.
ref_sheet	General character or design reference sheet	Keep in 01_reference_sheets.
wardrobe	Wardrobe, outfit layers, turnarounds	Keep in 03_wardrobe_modes.
l2d_guide	Live2D rigging guide/reference page	Use for setup notes, not direct import.
l2d_eye	Eye/iris/pupil/lash/brow layer assets	Verify isolated transparent PNG, then place in 05_live2d_layers/eyes.
l2d_mouth	Mouth/phoneme layer assets	Verify isolated transparent PNG, then place in 05_live2d_layers/mouth.
l2d_hair	Hair layer assets or hair guides	Split into front bangs, side locks, back hair, ahoge.
l2d_ear	Ear layer assets	Must connect under hair in assembled model.
expr	Expression busts / face portraits	Keep only corrected versions with connected ears and consistent badge.
pose	Motion, action, walk, run, stop, shield, guard	Keep for animation reference.
desktop	Desktop companion behavior and UI notification poses	Keep for desktop companion reference.
chibi	Chibi notification system art	Keep for notification/UI persona.
legacy	Numbered legacy images with weak filenames	Inspect manually and rename only if useful.
reject_composite	Failed grids, catalog pages, combined outputs	Keep in 99_rejects_redo or reference-only; do not use as individual assets.
misc	Unclear files	Review manually.

5. Claude prompt to use with this manifest

You are organizing an Alpecca character art archive. Rename files using the suggested canonical filenames in this manifest, but preserve original files in 00_raw_originals. Only move approved single-image assets into production folders. Treat any grid, collage, sheet, catalog, or multi-panel output as reference-only unless it is explicitly a design/reference sheet. Reject any Alpecca image with a black inner shirt, disconnected/floating ears, or inconsistent blue lanyard and centered ALPECCA ID badge. For Live2D layers, require isolated transparent PNG or plain white single assets.

Appendix A - Full image filename manifest

The table below lists every image file detected in the current /mnt/data workspace. Use the Suggested canonical filename column as the rename target, then apply the Action/Notes column for review.

Current filename	Suggested canonical filename	Code	Dims / Format	Action + notes
