

Alpecca Entire Project Map

Architecture and feature skeleton, source-reviewed 2026-07-09. Status colors are conservative and source-backed.

Done
Partial / conditional
Not started
Parked / deferred

Honesty note: VRoid/model fidelity, deep cloud lanes, and some sensory features are conditional or in progress; core runtime, tools, planner, routines, and Mindpage Layer A are implemented in this branch.

Alpecca Entire Project Map

Detailed subsystem skeleton. This page is a compact map of features, functions, and current status.

Done
Partial / conditional
Not started
Parked / deferred

Core Backend

- server.py routes and lifecycle
- WebSocket chat/activity stream
- runtime_status and diagnostics
- auth/tunnel/preview controls
- pytest regression spine

DONE

Brain / Agency

- CoreMind response loop
- Soul seven agents
- proactive/living loop
- constrained choice helper
- planner -> proposals
- tool registry and gates

DONE

Memory / Continuity

- memories, journal, core facts
- chat recall keyword default
- embedding backfill idle job
- Mindpage Layer A
- Mindscape sync/restore
- state log pruning

DONE

Embodied Apps

- House HQ main stage
- virtual app panels
- VRM viewer
- VCS studio port
- launcher app
- VRoid source experiment

PARTIAL

Art / Model Pipeline

- design lock and references
- stage4 animation library
- runtime atlas compile
- HF art publish
- VCS texture lab
- VRoid lanyard/accessories

PARTIAL

Automation / Tools

- routines empty by default
- watchers names/counts only
- desktop/file rooms guarded
- computer-use opt-in
- open_app allowlist
- proposal execution gate

DONE

Voice / Senses

- Kokoro/F5/OpenTTS stack
- voice modulation
- hearing/mic opt-in
- vision/screen/webcam opt-in
- Discord bridge
- OpenClaw integration

PARTIAL

Cloud / Ops / Docs

- Cloudflare shell only
- Hugging Face art/runtime assets
- ZeroGPU/Colab heavy lanes
- Mindscape worker
- docs archive/current index
- MCP parked

PARTIAL

Open / Future Work

- VRoid model matching is not 100 percent complete: hoodie/outfit/lanyard/base-model QA remains active.
- Mindpage Layer B/C (llama.cpp KV persistence and mmap/pagefile deep tier) are documented but not production-wired.
- MCP remains intentionally parked. External actions stay ask-first or opt-in.
- Legacy qwen3:8b style model paths are retired; runtime uses the configured approved ALPECCA_MODEL.

PARTIAL
